Sample Use Cases
Student Accounts Sponsored Billing

Description: This use case describes the process by which a user can search for a Sponsor Profile record. The use case begins when the user elects to search for a Sponsor and ends when the application returns the requested Sponsor Profile screen.

Title: Basic Path – Search by Sponsor Name

Pre-Conditions:
The Sponsor Billing Administrator (primary actor) has accessed the Sponsor Billing System.

Main Success Scenario

Step	Action
1	The Sponsor Billing Administrator enters at least three (3) characters of the Sponsor Name they are looking for in the 'Sponsor Name' field on the 'Sponsor Search' page.
2	The application displays a list of the possible matches under the Sponsor Name field using type-ahead functionality.
3	The Sponsor Billing Administrator selects the record from the dropdown that they wish to view.
4	The application populates the Sponsor Name in the corresponding search fields.
5	The Sponsor Billing Administrator selects the 'Find Sponsor' button.
6	The application displays the selected Sponsor Profile record.

Post-Conditions:
The application displays the requested Sponsor Profile record.

Extension A: Alternate Path – Search by Sponsor Name – Search Results Table

Replaces Step 3

Step	Action
3	The Sponsor Billing Administrator selects 'Enter.'
4	The application displays the 'Sponsor Name Search Results' table below the search criteria.
5	The Sponsor Billing Administrator selects the hyperlink for the Sponsor they wish to view.

Rejoins the Basic Path at Step 6

Extension B: Alternate Path - Clear Search

Extends from Step 2 of the Basic Path

Step	Action
2a	The Sponsor Billing Administrator selects the 'Clear' button at the bottom of the screen.
2b	The application clears the current search values from the screen.

Rejoins Basic Path at Step 1
